EXECUTIVE SUMMARY

A motivated Computer Science Engineering student at Sri Krishna College of Engineering and Technology with hands-on experience in Python, web development, and AI/ML. Passionate about building intelligent systems and scalable software, demonstrated through multiple end-to-end projects and competitive hackathon participation. Seeking an internship where I can apply my technical skills and contribute meaningfully to real-world products.

TECHNICAL SKILLS

Programming Languages: Python, C++, JavaScript
Web Development: HTML, CSS, JavaScript, React JS
Databases: MySQL, SQL
AI / ML: Scikit-learn, NLP, Sentiment Analysis, Text Classification, TensorFlow
Data Analytics: Microsoft Excel, Data Analysis Fundamentals

SOFT SKILLS

- Analytical Thinking & Problem Solving
- Team Collaboration & Communication
- Time Management & Self-Learning
- Adaptability to New Technologies
- Multilingual: Tamil (Native), English

PROFESSIONAL EXPERIENCE

Pinnacle Labs

Data Science Intern | Online | Jul 2025 – Aug 2025 (4 Weeks)

- Completed a 4-week virtual internship in Data Science with commendable performance.
- Worked on data science tasks and projects, demonstrating exceptional dedication and skill.
- Credential ID: PL/2025/JULP5/217 | Issued: August 17, 2025

NoviTech R&D Pvt Ltd

AI & ML Intern | Online | Aug 2025 (1 Month)

- Completed a hands-on AI & ML internship focused on practical applications of machine learning concepts.
- Worked on data preprocessing, feature engineering, and model training using Python and Scikit-learn.
- Applied data analysis techniques using Microsoft Excel and Python to derive insights from datasets.
- Studied and implemented supervised learning algorithms including classification and regression models.
- Gained exposure to real-world AI/ML workflows and industry best practices in model evaluation.

PROJECTS

Fake News Detection System | Tech Stack: Python, NLP, Scikit-learn, TF-IDF

- Built an ML pipeline to classify news articles as real or fake using NLP techniques.
- Applied TF-IDF vectorisation and trained classifiers including Logistic Regression and Random Forest.
- Achieved strong accuracy by fine-tuning preprocessing steps such as stop-word removal and stemming.
- Designed a clean interface for users to input news text and receive instant predictions.
- Evaluated model performance using precision, recall, and F1-score metrics.

Real-Time Collaborative Text Editor | Tech Stack: Python, WebSockets, JavaScript

- Developed a multi-user text editor enabling simultaneous real-time editing across browsers.
- Implemented WebSocket communication to synchronise document state with minimal latency.
- Handled conflict resolution to maintain data consistency during concurrent edits.
- Built a responsive front-end interface with live cursor tracking for each collaborator.

Real-Time Chat Application | Tech Stack: Python, Flask, WebSockets, MySQL

- Created a full-stack chat application supporting real-time messaging between multiple users.
- Built RESTful APIs with Flask for user authentication, room management, and message history.
- Stored user data and chat logs in MySQL with efficient schema design.
- Integrated WebSocket for instant message delivery without page reload.
- Implemented basic security features including password hashing and session management.

Online Grocery Order Processing System | Tech Stack: MySQL, HTML, CSS, JavaScript

- Developed a full-stack e-commerce system for browsing, ordering, and managing grocery items.
- Designed a relational database schema in MySQL to handle products, users, and order records.
- Built admin panel for inventory management, order tracking, and user administration.
- Implemented cart functionality, order confirmation flow, and status updates.
- Ensured responsive design for accessibility across desktop and mobile browsers.

Sentiment Analysis Tool | Tech Stack: Python, NLP, Scikit-learn, NLTK

- Built a text classification model to detect positive, negative, and neutral sentiments.
- Preprocessed raw text data using tokenisation, lemmatisation, and feature extraction.
- Compared multiple ML algorithms and selected the best-performing model for deployment.
- Visualised sentiment distribution across datasets using charts and summary statistics.

HACKATHONS & COMPETITIONS

Thooral Hackathon — PSG College of Technology, Coimbatore.

Selected for the Final Round; competed among top student teams to design and present an innovative tech solution under time constraints.

Origin Hackathon — Saveetha Institute of Medical and Technical Sciences, Thandalam, Chennai.

Selected for the Final Round; collaborated with peers to ideate, prototype, and pitch a problem-solving product within the hackathon timeline.

Lithos Hackathon — Chennai Institute of Technology, Malyambakkam, Chennai.

Participated and demonstrated problem-solving skills by building and presenting a tech solution within a competitive hackathon environment.

CERTIFICATIONS

PHP and MySQL — Indian Institute of Technology, Bombay (IIT Bombay)
Issued: Apr 2026 | Skills: SQL, MySQL, PHP web development | Credential ID: 39716449QG

Data Analytics Masterclass — NoviTech R&D Pvt Ltd
Issued: Aug 2025 | Skills: Data Analysis, Microsoft Excel, data interpretation and reporting | Credential ID: NT_B25DAE230

Data Science Internship Certificate — Pinnacle Labs
Issued: Aug 17, 2025 | Skills: Data Science, machine learning workflows, project execution | Credential ID: PL/2025/JULP5/217

EDUCATION

Bachelor of Engineering — Computer Science and Engineering
Sri Krishna College of Engineering and Technology, Coimbatore | Expected Apr 2028 | Grade: 8.22 (Till 3rd Sem)
